Notes

Several changes were made to the VMAP0 Political Boundary data to make it consistent with the CIA World Factbook: (1) The former Indonesian province of Timor Timur has been designated as East Timor (FIPS10-4 code TT); (2) Serbia and Montenegro has been combined to form Serbia-Montenegro (FIPS10-4 code YI); and (3) The United Kingdom Sovereign Areas on the island of Cyprus are properly identified as Akrotiri (FIPS10-4 code AX) and Dhekelia (FIPS10-4 code DX).

All data for Cyprus (FIPS10-4 code CY) are those reported for the Republic of Cyprus in the CIA World Factbook. The CIA World Factbook reports data for both the Republic of Cyprus and “North Cyprus” (the Turkish Cypriot area which calls itself the Turkish Republic of Northern Cyprus). It was unclear in the CIA World Factbook documentation whether data for the Republic of Cyprus included information for North Cyprus.
